Basin Boundaries

Summary

The Madera groundwater subbasin is part of the larger San Joaquin groundwater basin. The subbasin is bounded to the north by a combination of PLS Section lines and water district boundaries, and to the east by the crystalline bedrock of the Sierra Nevada foothills. The southern boundary of the subbasin is delineated by the San Joaquin River. The Aliso Water District and the Columbia Canal Company boundaries define the western borders of the subbasin. The basin boundary is defined by seventeen (17) segments detailed in the descriptions below.
